CARAVANNING 2023

PENTA ETNA

Penta Etna has everything you require from a permanent pitch awning – a depth of 3.5 m without the nuisance of a centre pole, and designed so that every inch of space is used. The material used is Isacryl, which allows the awning to breathe. Mosquito net windows in both sides, and the numerous opening options, make for an optimal indoor climate.

A sand-coloured roof imbues the awning with a soft warm light and the combination of the light strip in the roof and the large windows of clear film make the Penta Etna awning a bright and friendly place to spend time. The sturdy pole construction and the pentagonal shape mean stability for a long season at the campsite. Choose between the strong Zinox steel frame or the extra-strong Zinox MegaFrame for added stability. The combination of MegaFrame with extra winter securing means you can use your Penta Etna all year round.

NEW

SUN CANOPY FOR PENTA

The sun canopy features a unique construction in the form of a top rear panel, which ensures plenty of headroom, even if mounted on the Penta awning under the overhang. To provide plenty of light under the canopy, the rear panel has two windows.

The Penta sun canopy is equipped with a special PVC gutter, so you can connect the sun canopy and awning without having problems with rainwater. The specially designed downpipes ensure that the water is directed away from the gutter and off both sides of the sun canopy.

The design of the canopy perfectly matches the Penta awning, as the same roof material is used for both. For extra shelter, you can add a right and left side panel. The sides are available in our Etna colour scheme to match perfectly with Penta Etna, and to harmonise with older Penta tents in other colour schemes.

Available in a size that fits perfectly on Penta awnings in size G19, but can also be used on larger G sizes.

Depth: 200 cm.

FORUM ETNA

The flexible permanent pitch favourite. The adjustable fronts of the Forum give you plenty of options for adapting your indoor and outdoor space however you want them. The front can either be pulled back one metre to make space for a covered terrace area, or you can just pull one half back and create a porch in front of the entrance door. The front sections can also be switched so that you can place the door on whichever side you prefer. An additional front section is available as an optional extra, allowing you to create a little "hallway" and so achieve even greater flexibility.

The Forum Etna is designed solely with our strong Megaframe to give you all the stability you need for your permanent pitcher. This classic permanent pitcher awning is 3.5 metres deep and fits just about all caravan sizes. Forum Etna is designed in warm, dark shades particularly well suited to seasonal camping.

COMMODORE DAWN

COMMODORE NORTH

COMMODORE DAWN @ NORTH

Commodore is a fusion of classic Isabella design and contemporary materials. Its depth of 3 metres and the choice of three types of frames are a major advantage, especially for those who alternate between permanent pitching and touring and enjoy having plenty of space in the awning. Large panoramic windows make Commodore a pleasant place to be, with a unique inflow of light. For a pleasant indoor climate, the Commodore model has mosquito nets with a foil cover in both sides, as well as an integrated top ventilation panel in the middle of the front. On hot days and balmy evenings, the nets keep out annoying insects, at the same time allowing the air in the awning to circulate.

Commodore is available both as an Dawn and a North model.

AMBASSADOR DAWN

With more than 30 years on the market, our customers rightly expect a lot of the 'Ambassador', the ultimate touring awning which is straightforward to put up. Relatively light in weight, with a depth of 2.5m it offers all the opening options you could possibly wish for. Ambassador Dawn has a mosquito net panel in both sides and is made of Isacryl for a pleasant indoor climate. The roof is coated on the outside and has a patterned inside, which minimises the formation of condensation. For a good, natural inflow of daylight, and to ensure that the awning is a light and accommodating place to spend time, Ambassador Dawn has large, panelled panorama windows in the front. Available with all frame options.

CAPRI NORTH

Capri North is the ideal choice for touring caravanners. The tinted windows make the awning a pleasant place to be, as the large mosquito net windows provide extra ventilation without the annoyance of insects on hot summer days and nights. All front and side panels can be folded down to form a veranda or removed completely. Capri North is available with the Zinox tubular steel frame or the ultra-light CarbonX fibreglass frame.

VENTURA PACIFIC D250 & D300

The modern Pacific D250/D300 is available in shades of cleancut grey. The model boasts simple construction, making it particularly easy for touring. The material is a lightweight IsaLight fabric, which is also easy to keep clean thanks to its external coating. It has a mosquito net window with foil cover in one side for extra ventilation. So if you are looking to save time when camping, Pacific D250/D300 is the ideal choice. Choice of steel frame or the light-weight fibreglass frame for touring.

AIR

400

300

Annex

ISABELLA AIR CIRRUS NORTH 300/400

Cirrus North is a combination of classic Isabella design, high-quality materials and a new IsaAir system. The fronts and gables are made in our traditional solid-dyed Isacryl, which is a lightweight, robust and above all breathable material.

Thanks to the solid-dyed material, your air awning will retain its beautiful colours for many years to come. The Isacryl fabric allows your air awning to breathe, and the large mosquito nets at both sides make for the best possible indoor climate while minimising condensation.

Now available in widths of both 3 and 4 metres and with air release valves on all three front leg beams so that you can now deflate more quickly when taking it down.

Fits: Caravans with awning rail heights between 242 cm and 255 cm.

ERIBA TOURING

The Eriba Touring awning gives you a spacious lounge for your caravan, developed with the emphasis on functionality and detail. It's designed to allow the caravan door to be opened fully. You decide where to place the awning's door and window panels (all panels are interchangeable, so you can decide where to place the awning's door and window panels).

Suitable for Eriba Touring Troll, Triton and Familia caravans 2009 -> Fits the Eriba Touring Troll (530/535/540/542/550), Triton (410/418/420/430) and Familia (310/320) models. An adapter panel is included for the Triton and Familia models (310/320). The integrated roof pad ensures the awning forms a seal with the caravan, draining water away.

NEW

BUDDY

Buddy is a durable and stylish awning designed to be mounted on the caravan roll out awning to provide shelter and shade outside the caravan. You can place Buddy wherever you like on the roll out awning, giving you the unique flexibility to create an enclosed living space and a covered porch under this shady awning.

Buddy has a depth of 2.5 m and the front comes in four different sizes: 270, 320, 370, 420 cm.

Suitable for caravans with rail height of 240 cm to 264 cm.

SUN SHINE PLUS SUN CANOPY

The greatest possible stability and lowest possible weight are combined in the Sun Shine Plus canopy. Sun Shine Plus comes complete with a right and left side. CarbonX frame with the IsaFix connection system make putting up and taking down a fast and efficient. If you already have an Isabella full awning in 2.5 or 3 m depth, that frame can also be used for the sun canopy. Ask your dealer for more information. A front is available as an optional extra. This enables your Sun Shine Plus to be converted into a lightweight touring awning in next to no time.

ATLAS MEGAFRAME SUN CANOPY

The ultimate sun canopy for permanent pitching. The Mega Frame means that an Atlas Sun Canopy stands firm even in rain and strong winds. That's why it's the perfect sun canopy for the permanent pitcher. Atlas is attached to the canopy of your awning using 3 Mega F-links. It creates a shady terrace, doubling the area under the roof. For extra protection from the wind, right and left sides can be purchased as optional accessories. They zip quickly and easily onto the roof material. The sides come in colours matching Isabella Dawn- North and Etna awnings.

Dimensions: D 230 cm

LOGGIA SUN CANOPY

Create shade with the ultimate lightweight sun canopy. If you're travelling around from place to place in summer, the Loggia sun canopy is the perfect choice. It weighs just 8.5 kg (3 metres wide) or 10.2 kg (4 metres wide) and is attached directly to your caravan. You then erect it using 4 lightweight CarbonX poles (3 legs and 1 roof pole). The Loggia provides you with extra shade. It's no less than 2.70 metres deep, which makes it the deepest sun canopy in the Isabella range. The Loggia comes in two sizes: 3 metres and 4 metres wide.

Depth: 270 cm
Widths: 300, 400 cm

ISABELLA AIR ARC SUN CANOPY

Simple air canopy for caravans. Is simple and straightforward more your thing? If so, the Isabella Air Arc is the perfect choice for you. It's easy to put up, so it won't be long before you're ready to enjoy your holiday at your campsite. The Isabella Air Arc is made up solely of air beams and roof fabric and you just have to inflate in one place using the Isabella Air pump supplied. This sun canopy is made from a well-known material called Isacryl, which is a lightweight, robust, dyed material, whose colours retain their beauty for many years to come. To get shelter by the caravan, you can buy a side for the Air Arc!

Depth: 260 cm
Width: 380 cm
Fits: Caravans with a maximum 255 cm awning rail height

CASA

CASA permanently pitched awning – the flexible, durable solution for year-round camping

Our CASA is the ideal awning for you if you've found your dream campsite and would like to pitch there permanently, but still want a flexible solution with a classic awning and a permanent extension. CASA even allows you to disconnect your caravan from the awning and take it on the road with you. The robust aluminium structure and sturdy PVC materials make this awning really robust and allow it to survive all kinds of weather.

CASA is the very epitome of flexibility. Combine the individual modules, 120 cm wide, however you choose – at the front, ends and back of your awning. CASA gives you the opportunity to design your very own awning to suit your needs. Furthermore you can replace individual elements as you go – if you want to move the entrance, say, or insert an additional module.

Combine modules however you choose

To achieve maximum flexibility, CASA is made up of a simple modular system so that you can shape your awning however

you want it. The modules can be combined in an infinite number of ways – at the front, ends and back of the awning, and at the partition walls. It's even possible to create a covered terrace where you can sit and enjoy light summer evenings or frosty winter mornings.

VILLA

The ultimate awning for year-round camping

VILLA a unique year-round/permanent pitching awning, available in 5 widths. Its construction has been designed with maximum stability and durability in mind. Isabella VILLA is modular, and the choice of front panels mean that you can construct your VILLA just as you want it.

The awning should not only be suitable for use on hot summer days, but also a good alternative when the snow is lying on the ground. Year-round use places high demands on the equipment, and Isabella VILLA is composed of the best materials. The optimal sloping of the roof prevents the build-up of snow. Light is life, and the large windows and white curtains contribute to a bright, comfortable living space.

Design your own dream VILLA

VILLA is available in five different sizes and is set up using different modules. The many options let you design your own dream VILLA. VILLA can be extended by as much as 34 m². To create more space in the VILLA, you can buy a tunnel, which gives you an extra depth

of 70 cm. Why not use that extra depth to install a kitchen or create a TV room? If you want to enjoy the warm summer evenings longer, you can buy a covered porch for the right or left side of your VILLA.

Talk to your dealer about sizes and combination options, or find more information at www.isabella.net

ISABELLA CARPET

Stylish floor covering for your awning

Isabella Carpet is available in three different colourways that perfectly match your Isabella awning.

Our quality carpets are made in a smooth-woven combination of nylon threads, spun with PVC and finished in a heat press, so they can be fitted to any awning and even trimmed without fraying; they are lightweight and can be easily folded and cleaned. Depth: 2,5 m, 3 m or 3,5 m.

FLOOR HEATING

Used for underfloor heating in awnings. Build on a firm and stable surface.
